1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the "computer readable medium" (claim 5) is NOT disclosed in the original specification. Therefore, the question becomes whether non-statutory embodiments would be fairly conveyed to one of ordinary skill given the terminology utilized. In the instant, it would appear to be reasonable to interpret media for "carrying" as fairly conveying signals and other forms of propagation or transmission media to one of ordinary skill.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims recite a parallel method (claims 1-4) and computer program product (computer readable medium of claims 5-8) for performing a mathematical function.

"[t]o satisfy section 101 requirements, the claim must be for a practical application of the Sec. 101 judicial exception, which can be identified in various ways:

- . The claimed invention "transforms" an article or physical object to a different state or thing.
- . The claimed invention otherwise produces a useful, concrete and tangible result,..."

See "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" OG Date: 22 November 2005.

In order for claims to be statutory, claims must include a practical application with a concrete, useful, and tangible result. However, claims 1-8 merely disclose steps of performing mathematical function without disclosing a **practical application with a**

**concrete, useful, and tangible result, as they are pre-emptive in any application.**

More specifically, the result is not tangible result because it is not a real world result.

Therefore, claims 1-8 are directed to non-statutory subject
